## LA SELEZIONE DI VINI AL CALICE CON CORAVIN®

Il sistema Coravin® consente di versare un bicchiere di vino senza stappare la bottiglia permettendo così di degustare bottiglie di grande pregio. Questo sistema è dotato di un ago sottilissimo e di una boccetta contenente gas argon. L' ago penetra il tappo di sughero spillando il vino e allo stesso momento immettendo il gas che impedisce così all'aria di entrare nella bottiglia. Una volta estratto l' ago, il sughero si ricompatta garantendo al vino le massime qualità organolettiche e una lunga durata nel tempo.

### ROSSI
